

SWISS ENGINEERING

Perfect Smoothness in Tension Control
Just as if you were feeling the warp tension
with your own fingers!

[Learn more about our Tension Control...](#)

Warp Feeding

Electronic let-off motion, feed systems for warp knitting or narrow weaving machines, warp beams, warp stands and more.

CREALET AG NEWSFEED

Crealetter No. 20 Sep 2018

The Crealetter No. 20 from September 2018.

Upgrade to electronic warp let-off's

Upgrading of mechanical warp thread let-off's creates additional value.

Solutions for Narrow Weaving

Warp thread feeding systems for the Narrow Weaving Industry.

Highest quality warp beams

Warp feed to the weaving machine and constant tension.

Delivery roller drive

Weaving from creel with delivery roller drive.

Fabric Inspection

Machines

Optimal solutions for the inspection of fabrics.

Selvage Warper S 200

Achieve a constant wrap throughout the complete bobbin diameter range.

See the signs of change

Completely new solutions for warp feeding with cooperations.

Crealetter No. 19 Jun 2018

The Crealetter No. 19 from June 2018.

Methods for large fabric lengths

The Challenge: Enormous warp yarn consumption.

Launch into the Digital Future

Expanded program for force-, load- and weighing sensors and measuring electronics.

New Concepts for Airbags

New future demands for safety belts and airbags.

Close and accept

Crealetter No. 18 Mar 2018

The Crealetter No. 18 from March 2018

Smart Partnerships

Looking towards the future, our team works closely with our partners.
