

GF Machining Solutions

Liechti Engineering

Liechti is the worldwide market leader for five -axis airfoil machining solutions, to the turbine industry in aerospace and power generation. Liechti milling machines reduce machining times more than 30 percent as a result of specific profile machining technology and specialized CAD/CAM software. This high performance is based on engineering competence and know-how for full 5-axis and ultra-dynamic machining in titanium, inconel, nimonic, titanium-aluminide and high-alloy steels.
