

Join Us at various exhibitions all around the world:

ITMA Asia, Shanghai, 15 - 19 October 2018

ITMA, Barcelona, 20 - 26 June 2019

Retech all around the world. Please come and meet with us, explore the newest product developments and possibilities to heat treat your yarns and monitor your yarn tension. Retech your expert for monitoring your yarn tension and drawing your yarns to perfection has a wide range of novelties to be shown during the upcoming events.

We are looking forward to meeting you!

Heated Godet Rolls for High Quality Production of Synthetic Fibres

As an innovative and leading producer of components and godet rolls for heating and drawing of synthetic filaments and fibres, Retech has gained a leading position as a supplier of heated godet rolls, on-line yarn tension monitoring equipment and complete draw frames for spin draw lines in the worldwide synthetic fibre production. Heated godet rolls for applications up to 600 °C.

Yarn Tension Monitoring System Win-OLT in the DTY Filament Production

Retech is known as the original inventor of Win-OLT and is now in a position to serve the synthetic fibre production markets of all existing and new draw textured yarn (DTY) machines and to deliver and service the well known and over years proven Win-OLT system for monitoring the yarn tension in the DTY process.

Separator Rolls (ABSR) Air Bearing for Highest Draw Force and Temperature Requirements

Next to the heated and cooled godet rolls Retech established a range of Air Bearing Separator Rolls in various dimensions for high end applications. Where a low inertia, high draw forces combined with high yarn and environment temperatures are demanded the well proven Retech separator rolls will be the right solution.

Deutschsprachige Informationen

Als innovative und führende Herstellerin von Komponenten und Galetten für das Beheizen und Verstrecken von synthetischen Filamenten und Garnen hat Retech eine führende Weltmarktposition erreicht; dank über 40 Jahren Erfahrung in der Entwicklung/Konstruktion und Fertigung von beheizten, nicht beheizten und aktiv gekühlten Galetten und Streckrollen für die mechanische und thermische Behandlung von synthetischen Filamenten und Garnen. Daneben stellt Retech On-line-Überwachungssysteme für die Fadenspannung, luftgelagerte Verlegerollen und komplette Streckwerke für Spinn-Streck-Prozesse für die weltweite Garnproduktion her.
