

# Industry Applications

## Packaging

-  Micro-perforated and laminated woven sacks
-  Air- and water permeability for food and non-food
-  Tear-off systems
-  Dirt and dust barrier
-  Filtration
-  Machinery builders
-  Toll Perforating

[> More about Packaging](#)

## Converting

-  Micro-perforation
-  Perforating of roll-goods
-  Cutting of tapes
-  Defined cutting of films
-  Embossing

[> More about Converting](#)

## Pharmaceutical Industry

-  Vacuum Rollers
-  Rotary Sealing Tools
-  High Pressure and Precision Sieves (drilled)

[> more about Pharma Industry](#)

## Automotive

-  Perforated leather or artificial leather Seats
-  Interior application of foils/films
-  Heat and noise insulation

[> More about Automotive](#)

## Technical textiles

-  PTFE Staple fibres
-  FIBC's Sewing Yarn and fibrillated tapes for Big Bag Cloth
-  Carpet backing
-  Artificial grass
-  Ropes, Cords, twine/carrying Ropes

[> More about Technical textiles](#)

## Construction

-  House wrapping films
-  Higher absorption capacity for laminates
-  Concrete Fibers
-  Optical effects for surfaces
-  Perforated Insulation
-  Noise reduction
-  Perforated Wallpaper

[> More about Construction](#)

## Food and Agricultural Production

-  Food Packaging
-  Bread bags
-  Harvest Yarns

[> More about Food and Agricultural Production](#)

## Other

-  Embossing/Dimpling
-  Breathable textiles
-  Increasing of surfaces
-  Optical effects

[> More about Other](#)
