USTERIZED

USTER® makes a difference to retailers

Certified spinning mills use the USTERIZED® brand as a seal of quality for yarns tested and cleared with USTER® instruments. It's a sign of superior quality assurance in the production process.

USTER STATISTICS

The only globally-accepted standards for textiles

USTER® *STATISTICS* gives vital quality benchmarking data on fibers, slivers, rovings and yarns produced worldwide. Since the first edition in 1957, these values have been recognized as the ultimate authority for quality comparisons and global trading.

All about USTER®
STATISTICS

Spotlight

Quality and performance are essential to meet the rising demands of yarn users.

With the new USTER® *TENSOJET 5* spinners get a yarn strength measurement and a quality assurance system in one.

Details about the total package of precise measurement, reliable protection against quality claims and accurate forecasts of performance in later processes.
