## SYSTEMS

In the field of powerpacks and system construction, customer-specific solutions are developed and implemented from hydraulic valves and electronic modules. A broad knowledge of the components and many years of experience in system construction are the key for precisely coordinated system solutions.

## WANDFLUH PRODUKTIONS AG

Wandfluh Produktions AG manufactures mechanical precision parts and assemblies. In recent years, it has also established itself in the field of automation. It is continuously growing in a transnational and cross-sector market thanks to excellent quality and service at market prices.
