

CP's commitment: this page has been optimised for printing to help you save ink and paper.

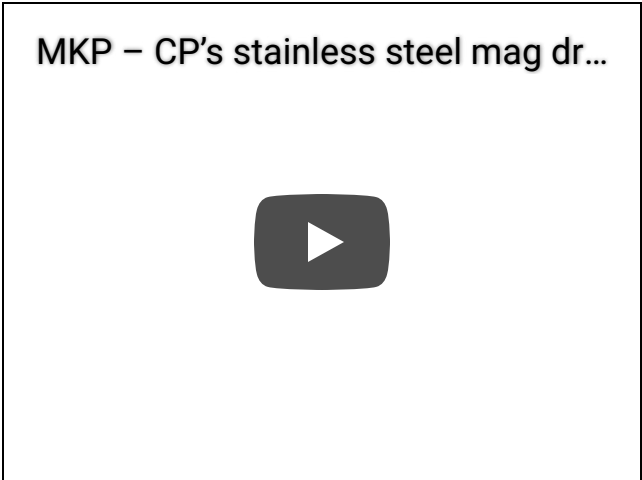

Welcome to CP

CP is a highly innovative Swiss precision engineering company. For over 60 years, we have specialised in developing and manufacturing intelligent high-tech products and providing services for international customers with the highest demands. Today, we generate more than 80 per cent of our sales in the global market.

We produce premium quality centrifugal pumps for the chemical (basic and fine chemical, agrochemical and speciality chemical), pharmaceutical, biotechnology, food and beverage, and pulp and paper industries. Through our network of representatives in more than 40 countries, we offer first-class advice and ensure fast and efficient customer service locally, around the world.

In research, development and manufacturing of chemical process pumps, such as sealless magnetic drive and double mechanical seal pumps, we combine state-of-the-art technologies with an unrivalled wealth of knowledge and experience. As part of our commitment to promoting sustainable production, we concentrate on energy efficient products and services, delivering green solutions that always go hand in hand with maximum safety and economy.
