Welcome to Spectros AG

Since the foundation of the company in 1946 precision optics is one of our core competencies. Innovations, the production of high-quality optical and mechanical components combined with first-class assembling technology are characterizing our optical systems.

Whether common or complex, the manufactured components and systems do meet your specifications.

As a member of the [Haag-Streit Group](#), Spectros AG supplies all companies of the group with optical components and optical systems for their medical devices for many decades already.

In addition, we also supply companies in various areas, such as laser technology, metrology, machine vision as well as geodesy and sensor technology.

Our personnel development department provide specific on- and off-the-job training for our employees in accordance with our quality management in order to meet the highest quality standards our clientele may require.

We advise, develop, design and produce in all batch sizes. Spectros AG is your partner for your challenges.
