

CORPORATE

Unitechnologies SA is a company active in the high technology domain of precision automation and has 50 years of experience. Thanks to our highly qualified professionals, we develop and realize production machines at the cutting edge of technology.

LEARN MORE ABOUT US
(/EN/ABOUT-US/)

CUSTOM MACHINES

Custom machines, mainly intended for the automated assembly of microtechnical products that are demanding in terms of precision and integrated processes.

LEARN MORE

([HTTPS://UNITECHNOLOGIES.COM/EN/PRODUCTS/CUSTOM_MACH](https://unitechnologies.com/en/products/custom_mach))

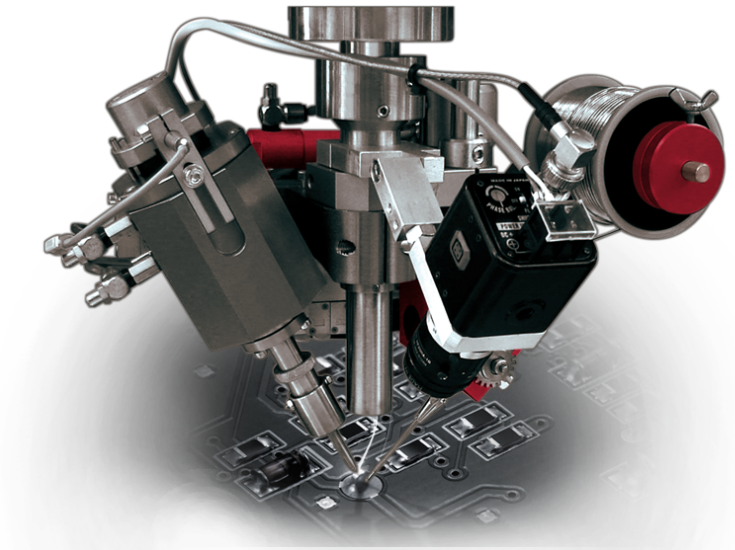

SELECTIVE SOLDERING

Automated selective point to point soldering processes using iron, laser, induction or micro-flame technologies, based on standard platforms.

LEARN MORE

([HTTPS://UNITECHNOLOGIES.COM/EN/PRODUCTS/SELECTIVE-SOLDERING-SOLUTIONS/](https://unitechnologies.com/en/products/selective-soldering-solutions/))

VOLUMETRIC DISPENSING

Automated high-precision volumetric processes for micro-volumes of mono or two component fluids down to 0.1mm^3 , based on standard platforms.

[LEARN MORE \(/EN/PRODUCTS/VOLUMETRIC-DISPENSING/\)](/EN/PRODUCTS/VOLUMETRIC-DISPENSING/)

Inta

VOLUMETRIC DISPENSING

SURGICAL SUTURES

Flexible automated standard platform for the cutting, assembling, crimping and packaging of surgical sutures into customized specific packaging.

[LEARN MORE \(/EN/PRODUCTS\)](#)

LASER SYSTEMS

Industrial platforms dedicated to the process automation of 3D laser surface processing, such as selective polishing and micro-structuring, as well as other laser applications such as micro-welding.
