TECHNOLOGIES.EU/](https://www.apco-technologies.eu/))

## **SPACE**

APCO Technologies is a major partner of the main European primes and space agencies for the commercial and institutional space markets

## **ENERGY**

APCO Technologies specializes in the development, realization, installation and maintenance of highly secured lifting cranes for nuclear power plants

## **INDUSTRY**

Starting from any functional needs, APCO Technologies provides customers with fully tailored machines as well as on-site technical assistance

Located in Aigle (Switzerland), in the Rhone Valley upstream of Lake Lemman, APCO Technologies is a family company founded in 1992.

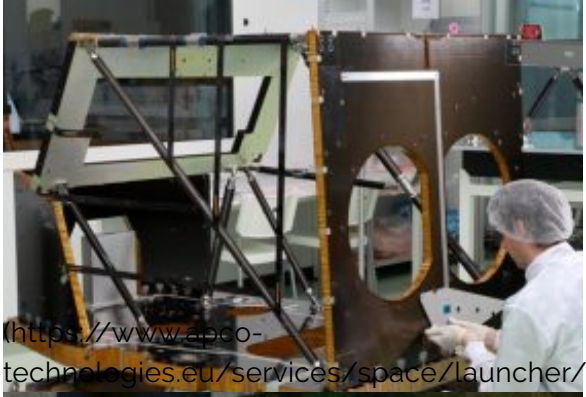

APCO Technologies specializes in designing and manufacturing high quality mechanical and electromechanical equipment for space, energy and industry applications. APCO Technologies provides innovative and competitive solutions to customers' specific requirements.

APCO Technologies performs feasibility studies, design and analysis, as well as manufacturing, integration and testing of the equipment it develops. APCO Technologies also provides on-site services to its customers such as maintenance, operations, technical assistance, commissioning and first article production.

All APCO Technologies activities are performed in accordance with the EN 9100 (Aerospace & Defence Quality Management), ISO 9001 (Quality Management), ISO 14001 (Environmental Management), OHSAS 18001 (Health & Safety Management) and ISO 27001 (IT Security Management) certifications in their latest versions.
