Electronic Design and Development Services

Art of Technology is an independent contract developer specialising in the design, development and miniaturisation of complex customer specific electronic devices and embedded systems for use in industrial, medical and space applications. Certified in accordance with ISO9001 and ISO13485, we are committed to integrity, innovation, quality, performance, value for money and building these into every solution we deliver, giving our customers the power to develop when, where and how they choose.

Innovation

Our blend of academic knowledge and industrial experience enables us to cost optimise the miniaturisation of electronic systems, realising distinctly innovative solutions which provide a real competitive advantage to our customers.

Our Expertise

- System miniaturisation & cost optimisation
- Low power electronics & power management
- Cryptography & data security
- Analogue & digital electronics

Typical Projects

News

Events

ESTC 2018
18 Sep - 21 Sep

The Westin Bellevue Dresden Hotel

Compamed 2018
12 Nov - 15 Nov

Messe Düsseldorf

Re-Certification Audit 2018

19.07.18
